Re: Grant #2249

Dear Dr. Mossman:

The Scientific Director and staff have discussed your letter of October 15 concerning partial support of the Fourth International Workshop on the Effects of Mineral Dust on Cells to be held in Quebec September 21-23, 1988.

I am pleased to tell you that we will make a contribution of \$2,500.00 (the maximum amount we allocate for the support of a meeting) to help defray the costs of the symposium. A check for that amount is enclosed with this letter. It would assist our record-keeping if you could send us a short written acknowledgement of the contribution.

We request only that these funds not be used to reimburse expenses incurred by participants from the industrial sector. We would also very much appreciate it if the conference organizers would hold open one registration slot for attendance by a representative from this organization.

Sincerely,  
  
David Stone
